# Architectural Review Guidelines

*Standards for exterior changes and additions*

## Purpose

These guidelines help owners prepare a complete application and understand the design principles used by the Architecture Review Board.

## Materials

Roofing, siding, shutters, and trim should be consistent with the home's original architectural style and the surrounding streetscape.

## Paint and Color

Color changes require samples or manufacturer color chips. Body, trim, shutter, and door colors must be submitted together.

## Landscaping

Plantings should respect the existing canopy, preserve sight lines at intersections, and avoid invasive species.

## Submittal

Include a site plan, photographs, product specifications, and a timeline. Incomplete applications will be returned.

*Sample document for template demonstration. Replace with the current adopted version before publishing.*
